## CAN'T EMPTY THE OCEAN

Andrew Larsen, of Sorensen & Larsen, merchant tailors of Sait Lake (lity, was so low with kidney disease that he was in bed and death was looked for almost daily.

The treatment was changed. He began to mend. His partner 'phoned the doctor he was slightly better. The doctor replied. 'It makes no difference. It is as impossible for him to recover as it is to empty the ocean.'

The progress was so slow that the patient would get discouraged and read our book for a bracer. He says he thinks he read it a hundred times. But the day he finished the third dozen he was back to business. Wonder what his physician thinks about emptying the ocean.

Physicians call kidney trouble Nephritis. This means inflamation of the kidneys.

The old duretics (kidney medicines) are kidney excitants. No wonder the kidney deaths have doubled.

Fulton's Renal Compound is the first successful kidney emollient thus reducing kidney inflamation and controlling kidney inflamation and controlling kidney troubles that have resisted all known treatment, as in the stove Sait Lake case. Literature mailed free.

It has been well said, that a disease known is half cured. Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system.
